

NOMACORC

Pops Ocean

synthetic

Ocean-bound plastic

The first sparkling wine closure that helps protect the oceans

NOMACORC Pops Ocean is the first cork for sparkling wines made from recycled raw materials collected from ocean waste. Using Pops Ocean is a responsible choice for the environment, as it helps protect the oceans, but it's also the choice of quality for your sparkling wines, as it preserves their delicate sensory profile.

PREMIUM FEATURES INCLUDE:

Made from recycled OBP* (recycled marine waste)

Unsurpassed sensory neutrality

Controlled, constant oxygen supply

No TCA, no sensory defect

Recyclable

- Good CO₂ pressure retention over time
- No bottle-to-bottle variations
- 2+0 design and customizable print on skirt
- No crumbling or washer separation
- Excellent mechanical performance

	Pops Ocean
OBP* equivalent collected in g / cap	12 g
Customizable printing	Yes
Diameter	28.5 mm
Length	48 mm
Weight / cap	8,5 g
Chamfer	Symmetrical / Asymmetrical

Patented co-extrusion process

Our patented co-extrusion process consists of two stages. First, raw materials are mixed, melted, and extruded to create a long, foamed cylinder, forming the closure's core. Then a second extrusion process applies a flexible outer skin, which is thermally bonded to the inner cylinder. The shape is stabilized in cooling water before our high-speed cutting operation cuts the closures to

the proper length. Our technology is a continuous process which ensures complete bottle-to-bottle consistency and performance. The products consist of an inner foam core which allows predictable and defined oxygen ingress rates and an outer skin material that ensures smooth extractions, reinsertions and trouble-free bottling line performance.

Benefits/features

- Patented co-extrusion technology creates wine closures that provide consistent, predictable oxygen permeation, eliminating off-flavors due to oxidation, reduction, or cork taint
- Uniform, small cell structure of foamed core, combined with elastic skin, provides more precise preservation performance than that of natural, technical, agglomerated, or screw-cap closures
- State-of-the-art manufacturing technology produces closures that are identical from batch to batch, resulting in trouble-free bottling with traditional corking equipment
- Patented flexible skin ensures a long-term, tight neck seal, eliminating leakage, breakage, and crumbling
- Manufactured with food-industry-approved, inert materials
- Maintains the traditional bottle-opening ceremony

Quality/performance tested for

- Uniform foamed core cell size and density
- Dimensional consistency of length, diameter, and ovality
- Mechanical performance in extraction force; compression and recovery; wine splash; and leakage
- Sensory neutrality
- Ink adhesion

International quality certifications

- HACCP (Hazard Analysis and Critical Control Point)
- GMP (Good Manufacturing Practices)
- BRC-Packaging (British Retail Consortium – Institute of Packaging)
